Magic Colloidal silver

Natures Own Antibiotic

HOW COLLOIDAL SILVER WORKS

Colloidal Silver is a powerful antimicrobial liquid containing silver ions which helps destroy bacteria, fungi and viruses. It is most commonly used as a natural antibiotic and to promote healing or fight disease in the body. It also has a powerful positive effect on the immune system when taken internally.

Extensive research into the curative properties of silver conclude that silver works on a wide range of bacteria, without any known side-effects or damage to the cells of the body, and it is safe to take with other products.

Regarding the innate ability of silver to control infection, research shows that all infection causing organisms tested were destroyed by the silver ions, including some that were resistant to all known antibiotics. No undesirable side effects of the silver treatment were apparent.

The fact that silver kills bacteria is being rediscovered something which has been known and applied for centuries.

The presence of colloidal silver near a virus, fungus, bacterium or any other single celled pathogen works as a catalyst disabling its oxygen metabolism enzyme its chemical lung, so to speak. Within a few minutes the pathogen suffocates and dies and is cleared out of the body by the immune, lymphatic and elimination systems.

When compared to pharmaceutical antibiotics, colloidal silver

- Leaves beneficial tissue-cell enzymes intact
- Has never been known to have resistant strains develop
- Is effective against more than 650 disease causing pathogens including viruses: antibiotics are effective only against about 12 forms of bacteria and fungi, but never viruses.
- Is considered to be a second immune system
- Is absolutely safe for humans and all multi-celled living matter.

HOW TO TAKE COLLOIDAL SILVER

Colloidal Silver can be taken orally and it can be sprayed or applied topically with the Gel.

When using Colloidal Silver, drink AT LEAST 1 litre of water daily to aid the flushing process.

ORAL DOSES

To maintain good health and assist in preventing viral and bacterial infections.

Adults: 15-20mls Children under 12yrs 5-10mls daily

To treat illness and infection Adults:25-30mls hourly Children under 12yrs: 10-15mls hourly

These doses can be taken more frequently if required. At all times, colloidal silver doses are best held under the tongue for 30-60 seconds before swallowing. Colloidal Silver can also be used as a gargle.

Used in this way Colloidal Silver can help impede and heal :Bad Breath and tooth decay - chronic fatigue - colds and flu - diarrhoea - dysentery - food poisoning - gastric flu - indigestion - mouth and throat infections - travellers belly - ulcers - viral and bacterial infections. Good for soaking dentures.

Colloidal Silver is an excellent water purifier.

Add 50mls/litre, shake well and wait ten minutes before drinking.

Use Colloidal Silver Gel on your skin as a protection against all skin infections including, acne and pimples, eczema, athlete's foot, chilblains, boils, warts, yeast infections, cold sores, sun spots, grazes, rashes, leg ulcers, etc

A thin layer of gel on the face and hands every morning and evening acts as a moisturiser. Great for oily or acne skin Also beneficial as a face lift sensation tightening cosmetic night or day cream underneath your daily creams. You will feel the difference immediately and notice a change in a short time. Helps problem skin ,pimples too ! Colloidal Silver Gel stays on the skin for a much longer time than Colloidal Silver liquid and is therefore much more effective. It is transparent, completely odourless and does not stain.

Safe for animals

Can be used on animals. The gel will stay on longer than other creams even after it is dry & helps keep out infections. No smells to bother the animal and does not sting .

Colloidal Silver Spray

Colloidal Silver spray could be the most useful health enhancement product you own - and you can take it and use it everywhere.

Body Spray

Spray on affected areas hourly or as often as required until condition is healed. A dressing material such as gauze or wadding can be soaked in Colloidal Silver and kept in place with water proof tape or plastic wrap. Adhesive dressing strips can be used. Change at least three times daily.

Colloidal Silver Spray and Gel can be used in these ways on: Abrasions - acne - allergies - athlete's foot - body odour (it is very effective as an underarm deodorant since most underarm odour is caused by bacteria breaking down substances released by the sweat glands) burns - cuts - conjunctivitis - dermatitis - eczema - hemorrhoids - insect bites - nappy rash - parasitic infections rashes - razor nicks - sunburn - warts - wounds.

Around and in the home: Spray on rubbish to prevent odours - spray benches and food preparation surfaces spray fridge, freezer and food storage bin interiors - spray on top of contents of open jars and condiments and inside of lids before replacing - spray plant foliage to stop fungi, mould, rot and most plant diseases - spray telephone mouth pieces and headphones - spray toilet seat and bowls - kill persistent odours.

Nasal Spray: For irrigation of nasal problems, sinusitis, colds etc spray and sniff up each nostril 6 or more times daily.

To prevent infection by airborne pathogens, spray and sniff every one to three hours when on airplanes, in air conditioned offices and work places, and in crowded public places. A concentration of silver ions between 8 and 15ppm.mg/l is recommended for nasal spray.
